## **NOMAD BOX – DATA SHEET AND PRODUCT DESCRIPTION**

### **GENERAL PRODUCT DESCRIPTION AND MARKET INTENT:**

The rugged Nomad Boxes are an ideal solution for storing of work or sports equipment. Designed specifically as a storage box for travel and adventure sports, and tough enough for professional or military storage.

Structurally designed and fabrication-material researched to be tough yet affordable. As long-time overlanders, we saw the need to fill the market gap between brittle storage boxes intended for household use and high-priced cases intended for expensive equipment. Our market objective was to create a storage box mid-ranged in price, but tough enough for the most demanding outdoor enthusiast. A box that would be able to withstand a beating and meet the basic needs of outdoor storage requirements.

<b>SIZE, WEIGHT AND VOLUME:</b>	<b>Metric</b>	<b>Imperial</b>
<b>Exterior Dimensions:</b>	517 x 404 x 233 mm.	20.35" x 15.91" x 9.17"
<b>Interior Dimensions:</b>	454 x 342 x 203 mm.	17.87" x 13.46" x 7.99"
<b>Weight:</b>	3.2 Kg.	7.04 lb.
<b>Volume:</b>	31.5 lts.	8.32 gal.

THE NOMAD BOX

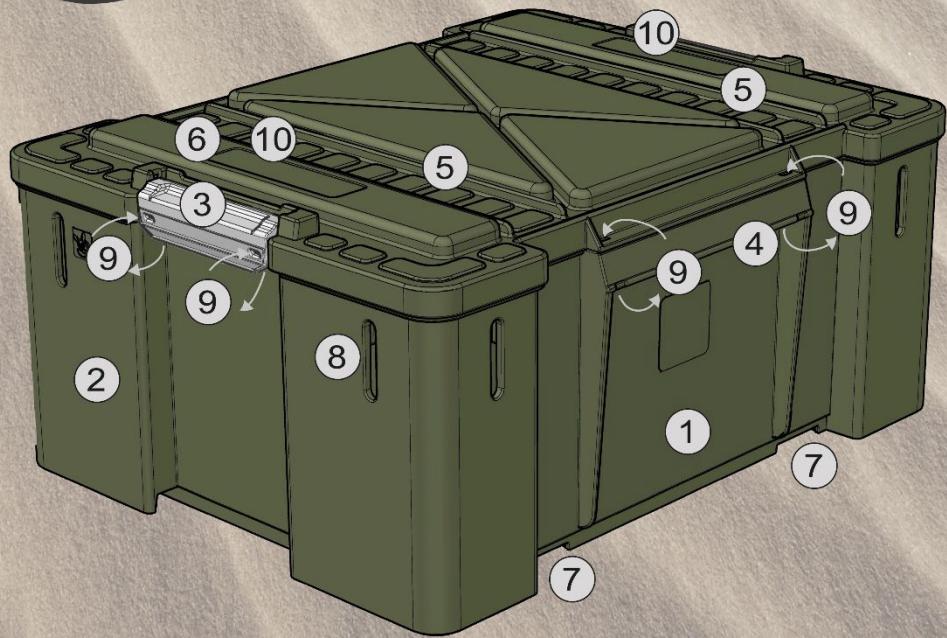

**X = 404 mm. ( 15.91" )**

**Y = 517 mm. ( 20.35" )**

**Z = 233 mm. ( 9.17" )**

### **COLORS and Reference Nos.:**

- Black - TNB-BLK001
- Grey - TNB-GRY001
- Olive Green - TNB-OLV002
- Sand - TNB-SND002

## THE NOMAD BOX

### **DESIGN DETAIL:**

Our Nomad Box has great stackability, with a great lock between boxes.

1. Straight sides to maximize storage space and vertical load transmission
2. Double-walled reinforced corners for maximum strength when stacking heavy loads.
3. Two comfortable locking clasps on the short sides, which act as lift-and-open handles.
4. Two lift handles on the long sides.
5. Two main tracks for cargo straps on the top in the width-wise direction.
6. Strap-notch above the clasps for lengthwise strapping.
7. Notches for holding down straps on the box below. This means that you can strap boxes in different levels if needed.
8. Long holes on the corner reinforcements that allow bungee cord hooks to be inserted to tie lighter items on the tops of the boxes.
9. Eight zip-tie holes to seal the box for extra safety in case of a fall or if you want to ship the box.
10. Two rectangular boxes on the lid for label placement so you can identify the contents of the box.

## **NOMAD BOX – TECHNICAL DATA SHEET**

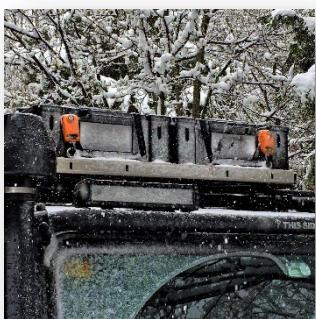

### **MANUFACTURING MATERIAL:**

Made of Polypropylene with Copolymer additive (PPC), which gives the box flexibility and high resistance to impact and fracture. This material also retains its sub-zero temperature characteristics very well. The fasteners are made of high-strength polyamide 6.

### **MATERIAL TESTING:**

We carried out an informal materials test by subjecting the Nomad Boxes to below freezing temperatures overnight and climbing on it with an all-terrain vehicle the next day. The result was totally positive as the box was not damaged and the lid was restored to its original shape.

### **WATER RESISTANCE AND STACKING:**

Our Nomad Box has a great water resistance, designed to withstand heavy rain even when used at highway speeds on the exterior of a vehicle with little or no water ingress. The box also has an excellent stacking capability as it has a tight hold between boxes. Stacked boxes in a vehicle will not slip off each other. The straight sides maximize storage space and vertical load transmission. The corners are double wall reinforced for maximum strength when stacking boxes with heavy loads. They are of a suitable size to ensure good handling even when loaded with heavy items.
